EXPERIENCE

Genesis Global Fintech Inc.   Remote
Software Developer   04/2022 - 02/2023
- Created and maintained company documentation application, including development of custom React components
- Implemented a custom feedback component, allowing users to quickly provide feedback on documentation
- Improved company documentation site build time by 50% through webpack and AWS configurations
- Led team Scrum ceremonies, analyzing sprint metrics via burnup/burndown charts and guiding team discussion

TECHNICAL PROJECTS

SolChess - [GitHub](#) | Ruby on Rails <-> React
Users can create an account, connect to the Solana blockchain, and play chess matches.
- Utilized bCrypt gemfile to store session username and encrypted password data in the API
- Created API functionality using MVC structure
- Designed client side application through React component structure, utilizing material UI framework
- Built custom routes using React Router DOM
- Implemented aesthetic features such as dark mode functionality

PetMatch - [GitHub](#) | React
Tinder-like application that connects to the PetFinder API, and displays cards that can be swiped left to pass, or right to add a pet to your saved animals page
- Created custom reusable structural and functional React components for simple and consistent front end design
- Designed custom routes for user to navigate through using React Router DOM
- Utilized fetch functionality to make GET request to external PetFinder API, rendering pet information to the DOM as Tinder-like cards

CashMap - [GitHub](#)
JavaScript application for comparing currency exchange rates for popular currencies, with prices updated from external API automatically.
- Implemented functionality to fetch data on currency exchange rates from an external API, and use it for local functions
- Built functionality that renders information differently based on the user's set "home" currency, providing exchange rates on the map calculated from the set currency

EDUCATION

Flatiron School   Remote
Full Stack Web Development, Ruby on Rails and JavaScript program   11/2021 - 02/2022

California University of Pennsylvania   California, PA
Master of Science, Exercise Science   05/2021

Gettysburg College   Gettysburg, PA
Bachelor of Arts, Health Sciences   05/2016

TECHNICAL SKILLS

JavaScript, TypeScript, React, Node, Ruby, Rails, AWS, SQL, PostGreSQL, HTML, CSS, Microsoft FAST, Git
